

Grade 3 Profile

Grade 3

2016-2017

Ms.
Lewandowski

Ms. Lewandowski has a Master's in Reading from Lourdes University. She has been teaching at Saint Rose since 2006. She has taught both preschool and third grade.

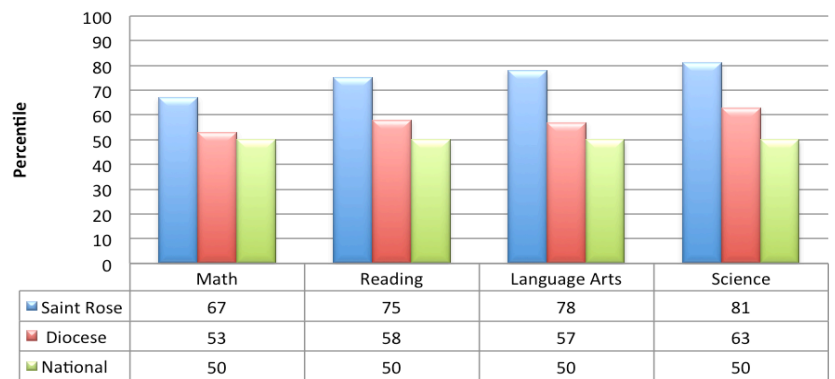

Ms. Germann

Ms. Germann graduated with her Bachelor's of Science in Education. She also has her Master's degree in Curriculum and Instruction from Lourdes University. Ms. Germann is in her 21st year of teaching at Saint Rose.

Saint Rose students begin taking the "Measurement of Academic Performance" (MAP) in Kindergarten. The third grade students scored higher than both National and Diocesan averages in each category in the fall of 2016.

Grade 3 MAP Scores
Fall 2016

Curriculum Highlights

Language Arts: Third grade is a year of growth as children become more independent readers. Children read a variety of genres of literature, including fiction and non-fiction. Third graders learn to read non-fiction text to gather information and then use that information to write paragraphs.

Math: Our math curriculum is designed to engage students in hands-on learning and mathematical discovery. Some topics of study are multiplication, division, perimeter and area.

Science: Rocks, soil, matter, animals and plants are all studied in third grade. Children are engaged in hands-on real world discoveries.

Social Studies: Map skills, government, and economics are a few of the topics in third grade. Students also learn about their cultural background and study the history of Perryburg.

Religion: Students learn about the 12 apostles, liturgical year, and parts of the Mass. They also learn The Apostle's Creed.

Third graders participate in a grant funded plant education program, Veggie U. In the program children investigate soil, worms, seeds and conditions that promote seed growth. They grow and taste a variety of vegetables and learn about healthy eating habits. The program culminates with a celebration where children snack on recipes created with the veggies they grew.
