

Mrs. French

french@saintroseonline.org

Mrs. French has a Bachelor's Degree in Early Childhood Education from Lourdes University and a Masters of Education Degree in Instruction and Curriculum from Spring Arbor University. She has experience teaching kindergarten and first grade, in addition to kindergarten readiness. She has been teaching at Saint Rose since 2016.

## Curriculum Highlights

**Language Arts:** Students learn upper and lower case letters and their sounds. Learning centers allow children to practice these concepts while fostering independent work habits.

**Math:** The goal of KR math is for students to transition smoothly into Kindergarten math. The focus is learning numbers up to 20 and writing numbers up to 10. Children work on patterns, shapes, and ten frames. These concepts are reinforced through projects and math centers.

**Science:** Science is very hands-on. Children learn favorite topics such as insects, weather, arctic animals, frogs, and many other fun and interesting topics throughout the year.

**Religion:** Students learn that God has made all people unique and special. Our program helps young children take their first steps on their journey of faith.
